IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Emergent coho observed & electroshocked approximately 30, juvenile coho electroshocked 2. Overwintering & rearing habitat, see attachments field notes and U.S.F.S. road condition survey data m.p. 2.726 Rd #6585. High quality productive stream greater than 100 emergent coho visual observed. System needs to be checked for spawning coho possibilities. Zarembo
